REMINDER!
Monthly Coordinator Call
There will be no coordinator call in the Month of December. The next one is scheduled for January, 17th at 10.30am

Enrollment Update (as of 12/07/2018)

- CREST 2 – 1233/2480
- ARCADIA – 128/1100 randomized; 525/4400 consented/not randomized
- CREST-H – 35/500

The MOST Team would like to send Congratulations to the following for having fully executed Clinical Trial Agreements:

- Henry Ford Hospital, Detroit, MI; PI – Daniel Miller, MD
- University of Wisconsin Wisconsin Health University Hospital, Madison, WI; PI – Azam S. Ahmed, MD
- Medical University of South Carolina; PI - Chirantan Banerjee, MD
- Regions Hospital, St. Paul, MN; PI - Haimam Husseim, MD
- SUNY Upstate University Hospital, Syracuse, NY; PI - Julius Gene Latore, MD
- Memorial Hermann-Texas Med Center, Houston, TX; PI - Andrew Barreto, MD, MS
- University of Utah Health, Salt Lake City, UT: PI - Adam DeHavenon, MD

Please allow me to introduce Dana Acklin, BA, as the new Project Manager for MOST at the National Coordinating Center. Welcome Dana! Please include Dana on all MOST correspondence going forward (ascklin@ucmail.uc.edu).

The Sleep SMART Investigator Meeting will be held Friday, February 22, 2019 at the Westin Detroit Metropolitan Airport. There will be an informal reception from 6pm-9pm on Thursday, February 21, 2019 and the trial will cover the cost of one PI and one study coordinator from each enrollment site. Additional study personnel are welcome to attend, but will need to make their own travel arrangements. Last day to make travel arrangements is January 22, 2019. If you have not received instructions for making travel arrangements please contact Kayla Gosselin at kkgosselin@med.umich.edu or Joelle Sickler at sicklejb@ucmail.uc.edu. Please remember to RSVP prior to making any travel arrangements.

If your site was invited to participate in Sleep SMART and has not completed and returned an Investigator Information Form, please complete as soon as possible if you are still interested in participating in the trial. The study team is beginning to issue Sleep SMART CTAs and will soon begin sending out the regulatory documents. Sites should also expect to receive consignment agreements and DUAs from Fusion Health (Greg Fletcher) soon. These will need to be executed prior to subject enrollment.

At the end, please find the latest bi-weekly StrokeNet newsletter and the dashboard.
Monthly Update
10 - December 2018

Steering Committee Call

Steering Committee Calls are a requirement for all NIH StrokeNet RCCs
(One representative per RCC required)

The next Steering Committee call is scheduled for 9-January, 2019, at 12 noon ET.

Just a reminder, minutes from all Steering Committee calls can be accessed via the www.nihstroke.net website. After log in, click on the “Minutes” tab, then at the dropdown menu, select “Steering Committee”.

Coordinator Webinar

Coordinator Webinars are a requirement for the NIH StrokeNet RCC Coordinators/Managers

The next Coordinator Webinar will be 23-January, 2019. Happy Holidays!

Professional Development Webinar

Professional Development webinars are a requirement for the NIH StrokeNet Trainees, however all are welcome to participate.

Stay tuned for the next Professional Development Webinar.

StrokeNet Enrollment Update
CREST 2 – 1233/2480
CREST H – 35/500
ARCADIA – 128/1100 randomized; 525/4400 consented

StrokeNet Trial Updates

MORE THAN 500 PATIENTS CONSENTED!

As of December 6, ARCADIA has 525 participants consented and 128 (of a target of 1100) randomized.

The leader board is heating up!

Which site will be the first to reach double digits in randomizations? University of Iowa, United Hospital in St. Paul, MN, and Oregon Health and Science University (OHSU) are all tied at 9 patients each. Tic toc!

And congratulations to all those sites that randomized their first patients within the past 2 weeks: Henry Ford in Detroit, Ochsner in New Orleans, University of Michigan in Ann Arbor, and University of Massachusetts Memorial in Worcester. Thanks for all your hard work!

More patients needed!

We still need to pick up our pace though. At present, our monthly per site randomization rate is holding steady at 0.21 patients per site. This is below our target of 0.30 per site per month. We have added 3 sites in the past 2 weeks, and are up to 106 sites. Of these, 92 have consented at least 1 patient, and 14 have not consented any. There are 56 sites that have randomized at least one patient, and 50 waiting to randomize their first.

The number of patients who have met biomarker criteria and are eligible but not yet randomized has increased to >50! We need everyone to enroll these patients aggressively if we're to be successful! It is a shame and a waste of effort and resources to lose these precious eligible patients. With the holidays coming up, it is essential to get as many patients randomized as possible so we stay ahead.
CIRB review all finished!

We want to thank everyone for their help with the continuing review. In particular, a big shout out to Sue Roll, our liaison at the IRB, and Mike Linke, the Central IRB Director, for their help and leadership in getting us through this challenging task.

Important upcoming announcements:

1. The DSMB meeting is December 7, 2018: we'll send updates after this occurs.
2. No webinar in December. Have a happy holiday!
3. We will hold a social gathering in conjunction with the StrokeNet gathering at the ISC in Hawaii for those who are making the trip. ARCADIA cannot pay for travel, but we would like to buy you a drink! So stop by on Wednesday February 6 2019 at 6:30-8:30 at the Hilton Hawaiian Village. Look for room details in your email.

Happy Holidays!

The ARCADIA National Team

The CREST-2 4th Annual PI Meeting in Chicago held on December 1st!

Thank you to all that joined us for the CREST-2 PI Meeting! We had 43 physician members from CREST-2 participating sites in attendance! Below are some important agenda topics that were covered:

- New Enrollment Tactics
- Enrollment of African Americans & other minorities
- Life Line Screening
- Successes in Lipid Management
- New Blood Pressure Target < 150 mmHg
- INTERVENT
- CREST-H
- Carotid Plaque & Brain Imaging
- Data Quality
- Cognitive Science & CREST-2
- TCAR in CREST-2
- Long Term Follow-Up
- CREST-2 Registry
- Site PIs & Publications

Please contact your site manager if you have any questions regarding these topics. The presentation slides have been uploaded on the CREST-2 website.

Crest2trial.org
We are up to 36 sites green lighted and 35 patients enrolled. Welcome to Ohio State, Washington Adventist, and University of Chicago! November was our second highest month so far for recruitment. Several sites are on the verge of onboarding including Wake Forest and their satellite Novant Forsythe, MGH, UVA, and UAB. UPMC continues to lead recruitment with 5 enrollments, followed by U Iowa, Columbia, and Michigan Vascular McLaren with 3. Maine Medical, Welli Cornell, Mayo Rochester, and UF Shands have 2 each. Eleven other sites have one each. This means 16 sites have yet to enroll their first. Please work toward green light status. We are working toward a target of 50-60 sites. We garnered some additional interest at the CRST-2 investigators meeting in Chicago on December 1.

Contact Randy Marshall rsm2@columbia.edu, Jaya Vijayan vijayan.jaya@mayo.edu, or Kevin Slane at KJS4@columbia.edu with any questions. We are still recruiting additional sites. Thanks!

The MOST Team would like to send Congratulations to the following for having fully executed Clinical Trial Agreements:

- Henry Ford Hospital, Detroit, MI; PI – Daniel Miller, MD
- University of Wisconsin Health University Hospital, Madison, WI; PI – Azam S. Ahmed, MD
- Medical University of South Carolina; PI - Chirantan Banerjee, MD
- Regions Hospital, St. Paul, MN; PI - Haitham Hussein, MD
- SUNY Upstate University Hospital, Syracuse, NY; PI - Julius Gene Latorre, MD
- Memorial Hermann-Texas Med Center, Houston, TX; PI - Andrew Barreto, MD, MS
- University of Utah Health, Salt Lake City, UT; PI - Adam DeHavenon, MD

Please allow me to introduce Dana Acklin, BA, as the new Project Manager for MOST at the National Coordinating Center. Welcome Dana! Please include Dana on all MOST correspondence going forward (acklindr@ucmail.uc.edu).

The Sleep SMART Investigator Meeting will be held Friday, February 22, 2019 at the Westin Detroit Metropolitan Airport. There will be an informal reception from 6pm-9pm on Thursday, February 21, 2019 and the meeting will begin on Friday with registration and breakfast starting at 7am. As a reminder, the trial will cover the cost of one PI and one study coordinator from each enrollment site. Additional study personnel are welcome to attend, but will need to make their own travel arrangements. Last day to make travel arrangements is January 22, 2019. If you have not received instructions for making travel arrangements please contact Kayla Gosselin at kcgossel@med.umich.edu or Joelle Sickler at sicklejb@ucmail.uc.edu. Please remember to RSVP prior to making any travel arrangements.

If your site was invited to participate in Sleep SMART and has not completed and returned an Investigator Information Form, please complete as soon as possible if you are still interested in
participating in the trial. The study team is beginning to issue Sleep SMART CTAs and will soon begin sending out the regulatory documents. Sites should also expect to receive consignment agreements and DUAs from Fusion Health (Greg Fletcher) soon. These will need to be executed prior to subject enrollment.

**CIRB Corner**

Congratulations to University of Alabama on receiving CIRB approval for CREST-H with no reviewer comments returned on their initial submission. Way to Go!

**New QAR Template and Reminder**

Please visit [http://nihstrokenet.org/documents](http://nihstrokenet.org/documents), under Administrative Documents, to download the 11.19.18 version of the Quarterly Activity Report Template. Please use this updated template for your next QAR, which is due 4-January, and covers the period 16-September – 15-December 2018. A list of activity dates is attached to this email for your convenience. If you have any questions, please contact Jamey Frasure, frasurjs@ucmail.uc.edu.

**NINDS News and Resources**

**Concept Synopsis Proposals**

Just a reminder, to ensure that concept proposals are reviewed by the NINDS in the timeliest manner, please send them to StrokenetInquiry@mail.nih.gov. Doing so will ensure the most expeditious response.

**Stroke Recovery Workshop: Bridging the Translational Gap in Stroke Recovery & Rehabilitation Research**

For those unable to attend the 27-28 November Recovery Workshop at the NIH, the following videocast links are available:

**New Financial Conflict of Interest Training Module Available**

Looking for a training to satisfy the requirement for investigators to complete training in financial conflict of interest (FCOI) regulations? NIH has developed a new training that institutions can use to help satisfy this need. This interactive training module allows for printing of a certificate at the end. Remember, as per the NIH Grants Policy Statement, institutions will require investigators to complete the training prior to engaging in NIH-supported research and at least every four years, and immediately under the designated circumstances:
Institutional FCOI policies change in a manner that affects Investigator requirements
An Investigator is new to an Institution
An Institution finds an Investigator noncompliant with the Institution’s FCOI policy or management plan.

Steering Committee Call

Steering Committee Calls are a requirement for all NIH StrokeNet RCCs
(One representative per RCC required)

The next Steering Committee call is scheduled for 9-January, 2019, at 12 noon ET.

Just a reminder, minutes from all Steering Committee calls can be accessed via the www.nihstrokenet.org website. After log in, click on the “Minutes” tab, then at the dropdown menu, select “Steering Committee”.

Coordinator Webinar

Coordinator Webinars are a requirement for the NIH StrokeNet RCC Coordinators/Managers

The next Coordinator Webinar will be 23-January, 2019. Happy Holidays!

Professional Development Webinar

Professional Development webinars are a requirement for the NIH StrokeNet Trainees, however all are welcome to participate.

Stay tuned for the next Professional Development Webinar.

Grand Rounds

Grand Rounds are a requirement for the NIH StrokeNet Trainees, however all are welcome to participate.

When: Thursday, January 31, 2019 - 4:00 PM ET

Presentation: Blood Pressure Variability and its Effects on Stroke Outcomes
Adam de Havenon, MD, University of Utah
Moderator:   Farhaan Vahidy, MD, PhD, University of Texas at Houston

To join the meeting:  https://nihstrokenet.adobeconnect.com/grandrounds/ Please enter as a guest, then your email address or complete name.  To take part in the conversation you must dial in, 1 (877) 621-0220 Passcode Number: 190825

**StrokeNet Network Meetings and Important Info**

**New Info!  6-February, 2019:**  For planning purposes, please RSVP to Rose by 4-January if you will attending the StrokeNet social hour at the ISC in Honolulu, Hawaii. The event will take place from 6:30 pm – 8:30 pm at the Hilton Hawaiian Village, Rainbow 1-2, as well as the adjacent patio.  Hors d’oeuvres will be served and a cash bar will be provided.

**NOTE:**  Going forward, the NIH StrokeNet will have one in-person network meeting per year, in the fall.  In the spring, there will be a half day all–network webinar.

**Trainee and Young Investigator Information and Opportunities**

**Neurorehabilitation and Restorative Neuroscience Training Network (NRNTN) Fellowship**

Please be aware an outstanding opportunity for your junior faculty:  NIH salary funding to support early faculty research development in Neurorehabilitation.  This is a national, 2-year, K-track opportunity for qualifying individuals; they will remain at your institution while receiving mentoring and support from the Neurorehabilitation and Restorative Neuroscience Training Network (NRNTN) program.  We are recruiting for our next cohort of scholars.  We have a two-stage application process.  The next deadline for brief preliminary applications is November 15, 2018. For details, see https://rehabmedicine.georgetown.edu/K12-webpage

The Neurorehabilitation and Restorative Neuroscience Training Network (NRNTN) provides outstanding research training and mentorship for clinical scholars in Neurorehabilitation and prepares rehabilitation clinician investigators for sustained and productive academic careers in Neurorehabilitation.  NRNTN is funded by the National Center for Medical Rehabilitation Research, NIH/NICHD.

This early career development and mentorship program seeks to prepare individuals with advanced neurorehabilitation related degrees (MD, MD/PhD neurologists, neurosurgeons, geriatricians, physiatrists and other physicians interested in
neurorehabilitation, physical therapists, occupational therapists, speech language pathologists and others) who will be in a position to define the mechanisms underlying neural plasticity and recovery of function following CNS injury, to identify and implement methods to enhance that recovery, and to influence health care and policy to benefit individuals with disabilities. The NRNTN brings together a regional network of 8 leading academic clinicians and scientists in Neurorehabilitation to provide mentored research training and career development for junior faculty level clinicians in Neurorehabilitation.

Our leadership team is composed of members from several clinical disciplines who are accomplished investigators:

- Georgetown University Medical Center
- MedStar National Rehabilitation Hospital
- Johns Hopkins University/Kennedy Krieger Institute
- Cornell University/Burke Neurologic Institute
- Massachusetts General Hospital Institute of Health Professions
- Harvard University
- Massachusetts Institute of Technology

If you or your junior faculty would like more information or would like to discuss the program and application process, please contact either of us.

Alexander Dromerick MD and Barbara Bregman PhD PT
Georgetown University Medical Center, MedStar National Rehabilitation Network

**Pre-doc / Post-doc Training Opportunity in Stroke Research at UTHealth**

We are looking for driven, motivated and enthusiastic doctoral candidates and recent doctoral program graduates in epidemiology, bio-statistics or data science who have a strong quantitative background along with an understanding of research design and research methods. The UTHealth Institute for Stroke and Cerebrovascular Disease will provide support for the pre-doctoral / post-doctoral position at the NIH salary guidance levels for up to three years. The trainee will have a unique opportunity to apply their research and analytic skill set in epidemiological, population health, and clinical areas pertaining to stroke and cerebrovascular diseases. They will train with highly skilled and reputable clinical and research stroke faculty at the Stroke Institute of UTHealth. The program will be tailored to individual trainee’s background and career goals. Benchmarks of success will be determined based on research productivity (abstracts, manuscripts, grant submissions). Support will be provided for further training and certifications. UTHealth in partnership with its clinical affiliate, Memorial Hermann, is one of the largest stroke care providers in the world and has a strong and well-established track record of research productivity and stroke training programs. Individuals interested in applying their skill set towards solving complex research questions in cerebrovascular disease are encouraged to apply.

This is a non-clinical training slot for folks who have Masters or PhDs in bio-statistics / epidemiology / bio-informatics or data science. Individuals will require a work authorization in the US. There are no citizenship or residency requirements.
Please forward:

1. CV
2. School Transcripts (Masters or PhD)
3. 2 letters of recommendation
4. Brief personal statement (not more than 1,000 words)

Email (Farhaan.vahidy@uth.tmc.edu) with application materials or for any questions.

NIH StrokeNet Employment Opportunities

Stroke Neurologist at Weill Cornell Medicine

**Job Description:** The Department of Neurology at Weill Cornell Medicine is seeking a full-time stroke neurologist at the Assistant or Associate Professor level to lead the stroke program at its Brooklyn Methodist Hospital campus. This neurologist would be a faculty member within the Division of Stroke and Hospital Neurology and their clinical, academic, and educational responsibilities would be governed by Weill Cornell Medicine. As part of their duties, they would serve as the Stroke Director at Brooklyn Methodist Hospital, where they would perform inpatient and outpatient consultations, develop and update stroke protocols and best practices, supervise quality improvement initiatives, and lead the program towards comprehensive stroke center certification—currently Brooklyn Methodist performs 24-7 thrombectomies but its stroke designation remains primary. Brooklyn Methodist Hospital is an academic, 650-bed, tertiary-care medical center located in the beautiful Park Slope neighborhood of Brooklyn, New York.

**Requirements:** The applicant must be a board certified physician in neurology and have completed an ACGME fellowship in vascular neurology. Further, the applicant should have a track record of achievement in patient care, academic scholarship, and professionalism.

**How to Apply:** Interested parties should contact Dr. Matthew Fink, Chair of Neurology at Weill Cornell Medical College, at: mfink@med.cornell.edu.

Yale University Vascular Neurologists

The Department of Neurology at Yale University is accepting applications for two full-time neurologists specializing in Vascular Neurology with a firm commitment to clinical research. Candidates must hold an MD or equivalent, be board certified or board eligible, and meet requirements for appointment at the rank of Instructor or Assistant Professor. Fellowship training in an ACGME fellowship in vascular neurology is necessary. Further, applicants must meet the criteria for medical licensure in the State of Connecticut. The essential duties for this position include: 1) providing acute stroke evaluations for patients at Yale New Haven Hospital, 2) providing inpatient care to the dedicated stroke service at Yale New Haven Hospital, 3) providing specialized stroke clinics through Yale Medicine, 4) providing acute stroke evaluations through the Yale New Haven Telestroke Program, 5) developing a clinical research program with anticipated long-term academic
development, 6) participating in ongoing clinical research activities within the stroke and neurocritical care divisions and StrokeNet program, and 7) teaching residents, fellows, and medical students. It is anticipated that this position will be 50% clinical and 50% clinical research and will be located in New Haven, CT. Please submit a CV and brief statement of interest to apply.interfolio.com/57355.

Review of applications will begin immediately and will continue until the position is filled.

Yale University is an Affirmative Action, Equal Opportunity Employer and welcomes applications from women, persons with disabilities, protected veterans, and members of minority groups.

Wake Forest Vascular Neurologist

The Department of Neurology is seeking an exceptional Vascular-Certified Neurologist to join the team at Wake Forest Baptist Medical Center. This is an opportunity to be a part of a comprehensive, academic stroke program focusing on clinical, research, education and community outreach.

THE STROKE DIVISION AT WAKE FOREST BAPTIST HEALTH

PROGRAM HIGHLIGHTS

- 7 vascular board-certified neurologists and 3 stroke Nurse Practitioners
- Leading the way with the most advanced, trusted and successful stroke care
- Large academic practice with blend of acute hospital practice, telestroke consultation, and clinic practice
- The largest network of telestroke hospitals in North Carolina, with 20 hospitals across the state
- Cutting edge stroke research across the continuum, with institutional (CTSA) and departmental infrastructures (StrokeNet) for supporting NIH and industry trials
- Interdisciplinary team approach to stroke care with Neurosurgery, Neurocritical Care, Emergency Medicine, and Rehabilitation Medicine.

REQUIREMENTS

- MD/DO
- BC/BE Vascular Neurology
- ACGME accredited fellowship training in Vascular Neurology
- Successful record of clinical and service excellence, leadership and an interest in graduate medical education
- Strong interest stroke continuum of care, including inpatient stroke service, telestroke consults, and outpatient stroke follow-up
- Research experience is preferred
- North Carolina licensure or eligible

COMPENSATION
The successful applicant will be appointed to the faculty of Wake Forest University School of Medicine at a level commensurate with experience and academic achievement. An attractive salary, benefits, relocation allowance, and non-clinical time for academic development are offered. Board certification and eligibility for NC licensure is required.

**WAKE FOREST BAPTIST HEALTH NEUROLOGY**

Wake Forest Baptist Health Neurology is a multispecialty, well-established and highly regarded practice and academic department with a diverse team of 54 faculty members in the following areas:

- Vascular Neurology
- Alzheimer’s Disease
- General Neurology
- Multiple Sclerosis
- Neuro-Critical Care
- Neuromuscular Disease
- Pediatric Neurology
- Headache

**DEPARTMENT HIGHLIGHTS**

- US News & World Report ranks Wake Forest Baptist #1 in NC and #47 in the nation for Neurology and Neurosurgery
- Joint Commission designated Comprehensive Stroke Center- one of just 33 centers in the United States designated to-date as comprehensive
- Movement Disorders Center- one of the oldest and most highly regarded programs in the country
- Comprehensive Epilepsy Center- ranked among the top epilepsy programs in the U.S.; one of the few Epilepsy Centers in the Southeast to have met the Level IV guidelines of the National Association of Epilepsy Centers
- ALS Center- one of only 34 in the U.S.-provides exceptional care for patients with amyotrophic lateral sclerosis and engages in cutting-edge research and translational science

**Full-time Vascular Neurology Faculty Position, Spectrum Health Medical Group**

Title: Attending Vascular Neurologist
Field of Specialization: Stroke

Job Description: Spectrum Health’s Department of Neurological Health is seeking to add a full-time vascular neurologist to their five board-certified vascular neurologist team. This new addition will participate in the Joint Commission certified Comprehensive Stroke Center at Butterworth Hospital in Grand Rapids, Michigan and support outreach to our surrounding regional hospitals. In addition to research opportunities, the position includes
neurology residency and medical school teaching with faculty appointments through Michigan State University.

Spectrum Health Butterworth Hospital is a hub for regional stroke network in West Michigan.

Two Full-time Neurologists Columbia University

Title: Assistant/Associate Professor of Neurology

Field of Specialization: Stroke

Link to Apply: http://pa334.peopleadmin.com/postings/1605

Job Description:

The Department of Neurology at Columbia University is seeking two full-time neurologists at the assistant or associate professor level specialized in the area of Stroke.

These neurologists will be participants in the Joint Commission certified Comprehensive Stroke Center at New York Presbyterian Hospital Columbia sites in Manhattan and Westchester County.

Requirements: must be board certified in neurology and have cerebrovascular fellowship training. Candidates should possess a demonstrated record as a clinician and should possess excellent patient care, teamwork, and interpersonal skills.

Position 1: Stroke faculty at New York Presbyterian Hospital – Columbia University Medical Center in Manhattan. This position will include inpatient and outpatient clinical practice, teaching fellows and residents, and may include work on clinical trials or research. Hospital duties include Quality Assurance participation in addition to attending on the inpatient stroke and consultation services.

Position 2: Stroke Director at New York Presbyterian Lawrence Hospital in Bronxville, Westchester County, New York. This position will include inpatient stroke consultations, development and updating of stroke policies and procedures, overseeing data analysis and quality improvement for this primary stroke center, part-time participation in general neurology inpatient and ED consultation, and working with ICU physician and nursing leadership to develop protocols for and enhance care of critically ill neurology patients.

Please apply by following this link: http://pa334.peopleadmin.com/postings/1605

Requirements:
• M.D.
• All applicants MUST meet these minimum qualifications to be considered for the position.
  M.D. and board certified in Neurology is required. Faculty rank is expected to be at the Assistant or Associate Professor level, commensurate with experience and achievement.
• Must be able to meet New York Presbyterian and Columbia Doctors credentialing. Must be board certified in neurology and have cerebrovascular fellowship training. Candidates should possess a demonstrated record as a clinician and should possess excellent patient care, teamwork, and interpersonal skills.
